

PH3244

Experiment - NAME

Aumshree P. Shah
20231059^{a)}

(Dated: 2 April 2026)

Synopsis

ABSTREACXCT make sure that teh 1 ref is github, 2 is error pro and 3rd is the error
proopogation book

CONTENTS

I. Theory and Procedure	2
A. Theory	2
B. Procedure	2
II. Observation	2
A. obs1	2
B. obs2	2
C. Comments	2
III. Calculations and Characteristics	2
A. Sources of Error	2
1. Systematic Errors	2
2. Random Errors	2
B. Error Propogation	2
C. obs1	3
IV. Result and Conclusion	3
A. Comments	3

^{a)} aumshree.pinkalbenshah@students.iiserpune.ac.in

I. THEORY AND PROCEDURE

A. Theory

theory

B. Procedure

procedure

II. OBSERVATION

A. obs1

B. obs2

C. Comments

III. CALCULATIONS AND CHARACTERISTICS

A. Sources of Error

1. Systematic Errors

1. .

2. Random Errors

1. Uncertainty

B. Error Propagation

To calculate the standard deviation from values we have measured with some least count, we use the formula [2]:

$$\sigma = \frac{\text{Least Count}}{\sqrt{12}} \quad (1)$$

and to calculate the standard deviation for values we have applied to the instrument with some least count, we use the formula [2]:

$$\sigma = \frac{\text{Least Count}}{\sqrt{24}} \quad (2)$$

Furthermore after calculating the standard deviation, we propagate the error as follows

for result we use two times the standard error [4] wiki of standard error for 95 percent 1.96

C. obs1

IV. RESULT AND CONCLUSION

$$\hat{p}_t = \underset{(1.958)}{0.900} + \underset{(0.017)}{0.997} p_{t-1}, \quad (3)$$

Appendix A: Comments
